

# A compact tractor setting new standards in productivity and efficiency

This high-performance tractor makes a clear impact without compromising its maneuverability. With exceptional power packed into a compact-sized frame, the T454 redefines what a modern compact tractor can do for you and your property.

1. PTO cruise control

2. Projection head lamps

3. 2 sets of rear remote valves

6. Joystick control for frontend loader

5. Foldable ROPS

## High efficiency, 4-cylinder Yanmar diesel engine

The Japanese-made Yanmar engine delivers more torque with fewer revs than competitors in its class, significantly maximizing fuel efficiency. Its advanced liquid cooling system warms up the engine quickly and stabilizes temperature more effectively while the tractor is in operation.

#### Durable, shock absorbing axle configuration

The heavy-duty 4WD front axle enables the tractor to lift heavy loads and tow large attachments while absorbing shock and maintaining stability. Powerful hydraulics support the power steering system, which uses a dual-action mechanism with a hydraulic cylinder and tandemtype hydraulic pump.

#### Enhanced attachment controls for efficiency

To boost efficiency, this tractor features controls designed to expedite completion. Two sets of rear remote valves allow the operator to manage various attachments directly from the station, minimizing manual position adjustments. A dial or knob controls lowering speed, while draft control levers regulate depth for optimal ground engagement.

#### Interior detailing to promote operator comfort

Activate core functions such as the PTO on/off switch easily from the main console. Quickly receive alerts and diagnostic information via the digital display. The operator platform features a spacious and ergonomic seat and a flat floor with a rubber mat to enhance comfort during entry, exit, and driving.

### Factory installed joystick controls

The joystick controls come installed from the factory, so you can put the tractor to work as soon as it is delivered. Factory installation ensures that gears are configured perfectly and controls are positioned ergonomically.

# BY85 Backhoe

# Attachments

For heavy duty tasks, you can depend on TYM BY85 to deliver performance and power. Built to take advantage of the features of TYM Series 3 compact tractors, the TYM BY85 backhoe attachment is ideal for applications that require the extra power.
