

TJV985

Import, ISEKI
101 PS

An imported utility tractor that offers power at an unbeatable value

The TJV985 is the standard imported tractor resulting from TYM's partnership with Iseki, one of Japan's largest and most established agricultural manufacturers. This utility tractor delivers the power you need without compromising quality.

1. Advanced Digital Instrument Panel

3. Green Mode

5. Dial switch lever

2. Main shift 8 range power shift

4. External hydraulic lever (6 port)

6. Tractor work lights

High-powered Deutz engine

Built on precise German engineering, the Deutz engine uses Diesel Oxidation Catalysts (DOC) to convert carbon and particulate matter into less harmful emissions. This eliminates the need for regeneration cycles, minimizing maintenance requirements, downtime and the risk of repair.

Escort light

The work lamp stays on for an additional 30 seconds after turning off the engine to ensure safe disembarkation during night work.

3-point hitch with increased lift capacity

Take advantage of the enhanced lift capacity to tackle challenging tasks such as rotary tilling and weeding by effectively controlling the attachment's RPM using the PTO lever.

Deluxe cabin with climate control

This tractor offers enhanced visibility with standard heating and AC, along with easy entry and exit through both side doors. It comes equipped with a range of modern amenities to optimize operator comfort, allowing them to carry out tasks safely and productively in varying weather conditions.

Electric/Hydro hitch control system

This tractor comes equipped with a Bosch electro-hydraulic control (EHC) system for the rear hitch. The system allows for faster and more accurate responses to changes in power and position, enabling operators to lift and lower the hitch gear to exacting specifications. The system is especially useful for row crop farming, allowing more precise tillage and boosting the quality of harvest.

Power steering with hydraulic tilt for optimal ergonomics

The power steering of this tractor comes with a tilt function that allows operators to move the steering vertically to find the ideal position for easier turning. Other features like adjustable suspension seating and the hydraulic axle configuration also minimize fatigue and contribute to a more comfortable driving experience.
