T355

Compact, Series 3

A powerful compact tractor that helps you push the limits

Tackle challenges in tight spaces with the T355. Compact but durable and expertly engineered for efficiency, this tractor excels in greenhouses, orchards, and other confined areas where space is limited but power can't be compromised.

Optional loader with high lift capacity

2. PTO on/off switch

4. Cruise control

5. Foldable ROPS

6. Joystick control for front loader

High torque, water-cooled Yanmar diesel engine

The Japanese made Yanmar engine offers more torque with less revs compared to competitors in its class. Since it is water cooled, the engine warms up faster and stabilizes temperature more effectively while the tractor is running. The engine is also Stage V certified, for noise emission standards.

Dual filter air cleaner for engine longevity

An additional filter protects the tractor's engine from harmful particles, drastically extending the engine life.

Cast iron components for sturdier connections

For enhanced durability under heavier loads, the rear of this tractor features robust cast-iron components to connect attachments. The material improves hydraulic efficiency and extends component lifecycles.

Easy to open hood for convenient maintenance

The tractor hood can be opened in one motion, providing easy access to the engine and other systems for daily checks, routine service, and maintenance. The side panel can also be removed easily without the need for specialized tools.

3-point hitch with powerful lift capacity

The 3-point linkage on the rear has an impressive lift capacity that reaches the end ball joints. The rear PTO control can be used to adjust rpm based on the task, increasing it for more intensive applications like slashing and digging.

HST for infinitely variable drive speed

Responsive hydrostatic controls offers a smooth ride for operators, from the forward and reverse pedal to the powered steering wheel. These controls reduce the need for operator effort during a range of tasks, particularly while operating the optional front-end loader.
